

THE CAMPAIGN FOR MSU

MSU PARTNERS

FALL 2005

\$5.9 MILLION KELLOGG FOUNDATION GRANT FOR LAND POLICY PROGRAM

Over a three-year period, the W.K. Kellogg Foundation will invest \$5.9 million in the Michigan State University Land Policy Program to support research, education and innovation in partnership with Public Sector Consultants (PSC), a private Lansing-based policy research firm.

“We hope this grant will help Michigan State University further develop the tools necessary to help

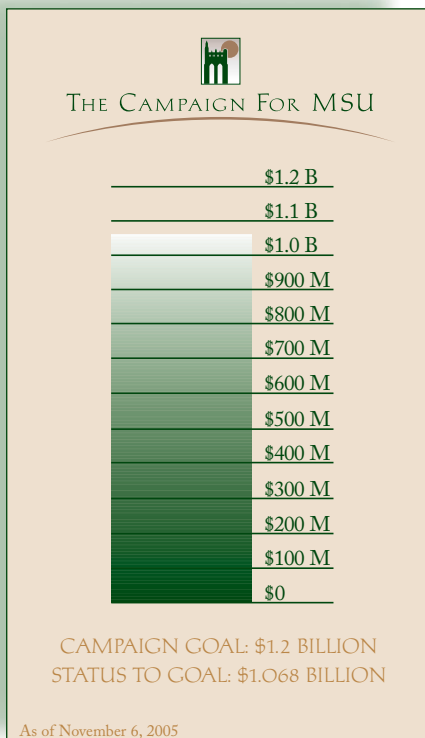

the people of Michigan make wise land use decisions into the future,” said Rick Foster, Kellogg Foundation vice president for Food Systems and Rural Development.

“Michigan is unique. No other state can boast of this kind of public-private partnership in land use policy,” said Dr. Soji Adelaja, Hannah Distinguished Professor in Land Policy and Director of the MSU Land Policy Program. “A broad consensus is forming around the premise that successfully addressing land use issues like sprawl, traffic congestion, and

resource conservation is critical to Michigan’s future prosperity.”

The Kellogg Foundation grant will build upon an earlier program, People and Land (PAL), a statewide partnership that has played a major role in initiating change in Michigan land use policy. The PAL approach focuses on educating citizens and policy makers about land use issues, informing them of innovative policy tools and alternative options, and convening organizations to understand various perspectives and implement appropriate land use agendas.

Science Labs Upgraded: Gerstacker & Strosacker Foundations Make it Possible

A \$1.5 million grant from the Rollin M. Gerstacker Foundation and \$250,000 from the Charles J. Strosacker Foundation support the renovation of science laboratories for the Lyman Briggs School of Science in Holmes Hall. The support from the Gerstacker Foundation was part of a \$2 million overall gift to MSU. (See accompanying story.)

“As a result, we have been able to complete phase one of construction in time for the 2005 fall semester,” said MSU President Lou Anna K. Simon of the gifts. “Lyman Briggs students returned in August to two new state-of-the-art science laboratories in which to learn.”

The renovations project will upgrade two biology labs, two chemistry labs and associated supply

continued on page 2

THE CAMPAIGN FOR MSU

Science Labs continued from page 1

and prep rooms. When completed, the Rollin M. Gerstacker Teaching Laboratories will provide contemporary, safe teaching laboratories for

do research with teams of fellow students, study the societal context of science and have more interaction with professors.”

Both foundations are based in Midland, Michigan. The Rollin M. Gerstacker Foundation was established by Eda U. Gerstacker in

1957 in memory of her husband. Also in 1957, Charles J. Strosacker, one of the pioneers of Dow Chemical Company, established a foundation to assist and benefit political subdivisions of the State of Michigan, and religious, charitable, benevolent, scientific and educational organizations.

The Lyman Briggs School opened in 1967 as a residential college with a math and science focus.

Lyman Briggs laboratories before renovation

emerging scientific fields; flexible and technologically advanced classrooms; modernized ventilation, electrical, disposal and gas systems; and improved research space.

“This renovation project will dramatically modernize existing facilities and create additional laboratories,” said Elizabeth Simmons, director of the Lyman Briggs School of Science. “The new lab classrooms will allow 25 percent more undergraduates to enroll in Briggs, where students enjoy smaller class sizes,

(l to r) Gerstacker Foundation Treasurer Alan Ott, Vice President Ned Brandt and President Gail Lanphear; Lyman Briggs School Associate Director Steve Spees and Director Elizabeth Simmons; and MSU Director of Corporate and Foundation Relations Lucille Fallon toured the renovated labs in November 2005.

Gerstacker Foundation Endows Chair

The second part of the \$2 million gift from the Rollin M. Gerstacker Foundation to Michigan State University is \$500,000 for the College of Communication Arts and Sciences to enhance the Ellis N. Brandt Professorship in Public Relations and raise it to the level of endowed chair. This position is held by Charles Salmon, who was named dean of the college on June 7, 2005.

“Establishing the Brandt Lectureship and the Brandt Research Assistantship and elevating the existing faculty position to the Ellis N. Brandt Chair adds substance and luster to an excellent program,” said MSU President Lou Anna K. Simon.

The endowment originally was established in 1988 by the Gerstacker Foundation to honor Ellis N. (Ned) Brandt, a vice president of the foundation and a graduate of MSU’s College of Communication Arts and Sciences. The added endowment funds will support research activities, an annual “Brandt Lectureship on Public Relations and the Public Interest” and a graduate research assistantship.

“This endowment will have a lasting impact on our university, and further strengthen our research and graduate programs in public relations,” Dean Salmon said.

Kellogg Grant continued from page 1

PAL was a key architect of work done by the Michigan Land Use Leadership Council, a bi-partisan panel appointed by Gov. Jennifer Granholm that made more than 150 recommendations in 2003 to Michigan legislators and local and state policy makers.

Dr. Adelaja and the Kellogg Foundation have been active in the PAL partnership. Through their work, municipal leaders have gained easier access to valuable training and information in helping them make land use decisions and cities have been given innovative tools to take control of their destinies by acquiring and improving abandoned properties, or combining their resources to provide services.

Bill Rustem, president of Lansing-based PSC, which directed previous PAL work, will serve with Adelaja as co-director of the Phase III PAL work. “PAL’s accomplishments have been second to none in raising the public’s and the media’s awareness of land use issues in both the political and policy arenas,” said Mr. Rustem, “but much more needs to be done. MSU’s Land Policy Program is positioned to take the lead in demonstrating how an engaged university and creative faculty can support Michigan communities and government with research-based information as they work to make smarter land use decisions.”

“We are excited to have the generous support of the Kellogg Foundation to enhance our work with the people of Michigan to find innovative solutions to one of the most critical issues affecting both quality of life and economic competitiveness,” said MSU President Lou

Anna K. Simon. “In the spirit of a 21st century land-grant university, we will build on our partnership through PAL and will align our research and engagement priorities to bring new knowledge to bear on the important issues of land use and land use policy.”

The third phase of PAL will continue the highly successful community grants program of previous phases. The new funding will also help establish a new competitive higher education land use research grants program that would support faculty from MSU, Wayne State University, the University of Michigan and Grand Valley State University in pursuing relevant research to address the needs of stakeholders in land use. Additionally, it will help MSU Extension to recruit a new core team, Land Policy Educators, to address local land use education and facilitation needs.

The W.K. Kellogg Foundation supports the vision of a world in which each person has a sense of worth; accepts responsibility for self, family, community and societal well-being; and has the capacity to be productive and to help create nurturing families, responsive institutions and healthy communities. The Foundation targets its grants toward specific areas: health, food systems and rural development; youth and education; and philanthropy and volunteerism.

UNIQUE NEW CENTER DEDICATED TO CRITICAL CARE

In this exceptional facility, our staff will be able to provide a level of care not available elsewhere,” said Dean Lonnie J. King of the MSU College of Veterinary Medicine, at the September 30, 2005 dedication ceremony for the Matilda R. Wilson Pegasus Critical Care Center.

The specialized new facility will enable the college to provide intensive care to critically ill horses and farm animals, teach veterinary students about the proper diagnosis and treatment of stricken animals, and conduct research that will lead to future improvements in the treatment of animals.

Made possible by a \$5 million gift from the Matilda R. Wilson Fund, the “Pegasus Center” is named in honor of one of Mrs. Wilson’s favorite driving ponies. The 9,000-square-foot facility is located adjacent to the Mary Anne McPhail Equine Performance Center in MSU’s veterinary medicine complex. Members of the college’s teaching and research staff collaborated in the design, resulting in a one-of-a-kind facility that will create specialists and experts in critical care services for large animals. A special feature of the new facility is the Linda and David Mehney Conference Room, equipped with video capabilities that will both enhance teaching and allow owners to visit and observe their sick animals without risking the spread of infectious diseases.

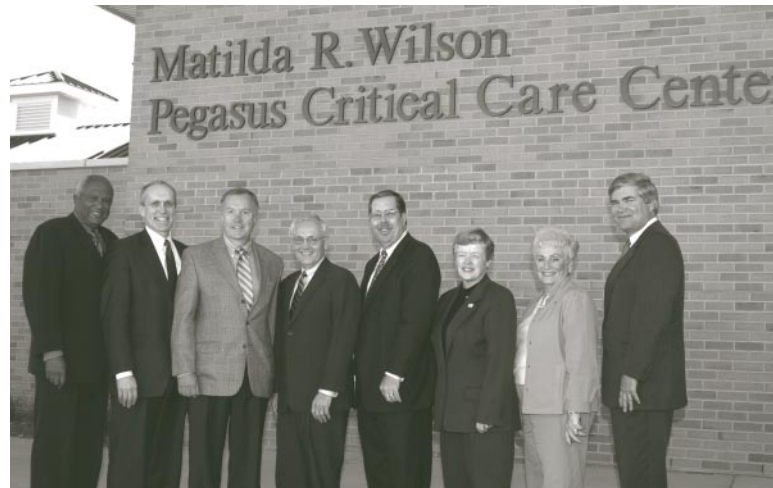

More than 100 people, including faculty, students and graduates of

the College of Veterinary Medicine, were on hand for the ribbon-cutting ceremony and to tour the Pegasus Center.

“This center wouldn’t have been possible without the support of the Matilda R. Wilson Fund, which has continued Matilda Wilson’s interest in large animals and farming,” said Dr. Frederik J. Derksen, professor of large-animal clinical sciences. “We are grateful for their generosity, vision and trust in us, as well as the tremendous support from the MSU president, board, physical plant and construction team. You will be proud of the impact this program will have.”

David M. Hempstead, president of the Matilda R. Wilson Fund, reflected on Mrs. Wilson’s long relationship with Michigan State University and former MSU President John Hannah, whom she met “80 years ago when he was a young agricultural agent.”

Mr. Hempstead said the fund has continued the relationship with MSU over the last 20 years. “In 1985, we asked ourselves, ‘What would Matilda R. Wilson like done?’ Our answer was, research and teaching in animal health to go on in her name.”

(l to r) Joel Ferguson, vice chairman, MSU Board of Trustees; MSU Provost Kim Wilcox; David Stephens, treasurer of the Matilda R. Wilson Fund; Dean Lonnie King, College of Veterinary Medicine; David M. Hempstead, president of the Matilda R. Wilson Fund; MSU President Lou Anna K. Simon; MSU Trustee Dolores Cook; and David Porteous, chairman, MSU Board of Trustees.

He continued, “The current trustees have confidence in the College of Veterinary Medicine. We believe the college and the Pegasus Center will accomplish a great deal. On behalf of the Matilda R. Wilson Fund, I ask that all who work here, all who research here, and all who learn here take inspiration from Matilda R. Wilson’s lifetime of accomplishments and achievements.”

MSU President Lou Anna K. Simon inducted the Matilda R. Wilson Fund into the William James Beal Society, the university’s highest donor recognition classification, in acknowledgement of contributions exceeding \$10 million. “Our pledge to the Wilson Fund and to the people of Michigan is that their investment in Michigan State University will rebound many fold as we continue to move forward with boldness by design.”

STUDENTS APPLY MATH TOOLS IN BIOLOGY/ECOLOGY COURSES

A \$480,000 grant from the Andrew W. Mellon Foundation supports scholarships and fellowships for biology students in a hands-on summer program at MSU's Kellogg Biological Station (KBS).

The program, Enhancing Linkages Between Mathematics and Ecology (ELME), offers graduate and undergraduate students the opportunity to learn how to apply mathematical and statistical tools to questions in ecology and evolution.

ELME is designed for students with little formal training in mathematics, but with an interest in learning math in an interactive format. The program includes three independent one-week math courses focusing on different mathematical and statistical topics followed by a four-week field ecology and evolution course. KBS Director Kay Gross said, "Ideally, students participate in all three math modules and the field course. This gives them the chance to apply all the tools presented in the math classes to ecological questions. However, the program is designed to allow graduate students to take some or all of the math courses in any year depending on their background and needs. This is a unique opportunity to integrate math and ecology in a field setting where students receive the support of expert faculty recruited from around the country."

Ambitious ELME students may also take advantage of other courses available at KBS during the summer

or return to participate in independent research projects. Ornithology, ecology, biogeochemistry and plant systematics are some of the field-based courses offered at the station in the summer. The ELME program is open to students from other institutions as well as Michigan State University.

education complex and one of North America's premier inland field stations. Located between Kalamazoo and Battle Creek, the 4,065-acre station includes Kellogg Bird Sanctuary, Kellogg Farm, the Kellogg Biological Laboratories, the KBS Conference Center, and the Lux Arbor Reserve. World

Dr. Jeff Conner instructs ELME students Julia Littell, Sigrid Smith, and Sarah Toas on how to quantify observing pollinator visitation rates on purple coneflowers.

Dr. Gross said, "We are most grateful for the support that the Mellon Foundation has provided for this special program. The Mellon Foundation grant makes it possible for students who would normally work during the summer to participate in ELME without making a significant financial sacrifice."

KBS is Michigan State University's largest off-campus

renowned for its contributions to ecological science and evolutionary biology, the station is home to one of the National Science Foundation's Long-Term Ecological Research sites. More information about ELME and other educational and research programs at KBS can be found at: <http://www.kbs.msu.edu>.

CN FORUM DRAWS STUDENTS, LEGISLATORS, BUSINESS LEADERS

The first Annual CN Forum: “Strengthening Canadian-U.S. Relations” was held on Thursday, October 6, 2005 in the Kellogg Center Auditorium on the Michigan State University campus.

Former Michigan Governor James J. Blanchard, who also served as the U.S. Ambassador to Canada during the Clinton Administration, was the first CN Distinguished Lecturer and gave the keynote address. Governor Blanchard emphasized that the relationship between the United States and Canada is vitally important to both nations and affects “the air we breathe, the water we drink, and our very economic livelihood.”

An MSU graduate, Governor Blanchard remarked that he was

Former Michigan Governor James J. Blanchard delivers the keynote address at the first annual CN Forum on Canada-U.S. Relations.

especially proud to see the large contingent of students present among the academics, business leaders from Detroit, mid-Michigan and

The Kellogg Center Auditorium was filled for Governor Blanchard’s address. Seated in front (l to r) are panelists Tim Hoeffner, policy advisor, Michigan Department of Transportation; Rocco Delvecchio, consul general of Canada; and Dennis Schornack, U.S. Section Chair, International Joint Commission. Behind them in row two (l to r) are Eddie Francis, mayor of Windsor, Ontario; and Harry Whalen, senior vice president, Michigan Economic Development Corporation.

Ontario, legislators, and members of the general public who filled the 300-plus-seat auditorium to capacity.

“The audience response to the MSU Canadian Studies Centre’s CN Forum was amazing, especially with the large participation by students interested in nurturing relations between our two countries. The future belongs to our young people, and we were very pleased to witness the intelligent and probing questions directed to the panel by the students participating in the forum,” said Gloria Combe, director, U.S. government affairs, CN.

Following the governor’s address on the mutual importance of border security and border cooperation between the two great neighbors, Canada and the United States, Professor Philip Handrick, director of the MSU Canadian Studies Centre, facilitated a lively and engaged discussion. The audience addressed questions to Governor Blanchard and a distinguished group of panelists: International Joint Commission U.S. Section Chair Dennis Schornack; Canadian Consul General Rocco Delvecchio; Eddie Francis, mayor of Windsor, Ontario; Tim Hoeffner, policy

Skillman Foundation Backs Future Teachers Program

For 45 years, the Skillman Foundation has helped children in metropolitan Detroit by improving their homes, schools and neighborhoods. Its annual Good Schools Awards—\$1.4 million in 2005 alone—recognize excellent performance and provide encouragement and incentives for Detroit area schools to improve in the coming years.

Looking ahead to helping Detroit attract and retain highly skilled and motivated “home-grown” teachers, the Skillman Foundation is sponsoring a program to help Detroit high school students who demonstrate a strong interest in entering the teaching profession prepare for college.

The “Future Teachers for Social

Justice” (FTSJ) program will build on students’ experiences in an established initiative—the Broad Partnership between the Michigan State University College of Education, the Detroit Public Schools and the Broad Foundation. Detroit high school students in the Broad Partnership program attend a three-week summer program at MSU, where they experience university life and take classes that help develop the academic and social skills that will benefit them in college.

A \$130,000 grant from the Skillman Foundation is making it possible for MSU and its Detroit Public Schools partners to work with these high school students throughout the 2005-06 academic year to

help them meet academic challenges, navigate the college application process, and prepare them for entrance into college.

“The Skillman Foundation grant is going to allow us to sustain our engagement with Detroit Public Schools students who we have already established a relationship with through the Broad Partnership,” said Sonya Gunnings-Moton, assistant dean, College of Education. “The Future Teachers for Social Justice program gives us the opportunity to not only facilitate the students’ readiness for college by working with them throughout the school year, but also their matriculation to Michigan State University and, ultimately, their pursuit of a career in teaching.”

CN Forum continued from page 6

advisor, Michigan Department of Transportation; and Harry Whalen, senior vice president, Michigan Economic Development Corporation.

The CN Forum on Canada-U.S. Relations was established by a \$200,000 endowment grant from CN as a venue for researchers, government and business leaders, students, the media and the general public to discuss important issues in U.S.-Canadian relations. A further gift of \$50,000 from the government of Canada will increase the endowment to \$250,000. The first annual CN Forum was hosted and organized by the MSU Canadian Studies Centre and the MSU Institute for Public Policy & Social Research.

At a reception following the formal program, (l to r) Alane Enyart of the MSU Canadian Studies Centre talks with CN Director for U.S. Government Affairs Gloria Combe and Hunter Cary, general superintendent, CN.

THE CAMPAIGN FOR MSU

MSU Honors Corporate Donors MSU Honors Corporate Donors

Over the course of the summer and into this fall, Michigan State University was pleased to recognize a number of local corporations for their longtime support of, and partnership with, the university.

President Simon welcomed corporate executives from LaSalle Bank, Consumers Energy, Auto-Owners Insurance, Delta Dental Plan of Michigan, and Jackson National Life Insurance Company to be her guests for lunch at Cowles House, the official residence of the MSU President.

These lunches, attended also by deans and directors of colleges and units receiving significant support from each corporation, afforded an opportunity to thank each company for its support, to present a memento in recognition of that support, and to provide updates on new initiatives and programming in the colleges/units as well as the university. MSU truly values its local corporate partners.

Auto-Owners Insurance

(L to R) Auto-Owners Chief Executive Officer Roger L. Looyenga and Chairman Herman J. Arends were hosted at Cowles House on August 2, 2005 by President Lou Anna K. Simon, who inducted Auto-Owners Insurance into the Robert S. Shaw Society.

Delta Dental Plan of Michigan

President Simon (2nd from left) presents the Abbot Society memento to Delta Dental Plan of Michigan, represented by (l to r) Dr. Thomas J. Fleszar, president for Underwriting and Sales; and Laura L. Czelada, VP, Finance. The presentation took place at a September 13, 2005 luncheon to thank the company for its support.

Jackson National Life Insurance Company

 Shaw Society.

CONGRATULATIONS! MSUFCU STUDY ABROAD SCHOLARS

In 2005, 49 students were awarded MSUFCU Study Abroad Scholarships. A gift from the Michigan State University Federal Credit Union makes it possible for MSU students in any field—from Accounting to Zoology—to take advantage of more than 200 programs in 60 countries

on all continents available through the MSU Office of Study Abroad.

Since 2003 when the MSU Federal Credit Union pledged

\$2.5 million to create this scholarship endowment, over 70 students have benefited. When fully funded in 2007, the MSUFCU Study Abroad Scholarship Program will help more than 130 students each year gain the academic, professional and personal enrichment the study abroad experience provides.

MSUFCU Study Abroad Scholars with members of the MSU Federal Credit Union Board of Directors, MSU President Lou Anna K. Simon, and Acting Dean for International Studies and Programs Jeffrey Riedinger.

Dow Corning Foundation continued from page 16

an eight-week period. The work focused on giving the teacher/interns a hands-on, quality experience in a science laboratory. Upon successful completion of the internship, the participants earned academic credit toward an MSU master's degree.

To show the university's appreciation, President Simon hosted an

October 17, 2005 luncheon at Cowles House for Dow Corning Foundation Chairperson Marie Eckstein, Trustee Kim Houston-Philpot, and Executive Director Anne DeBoer. Dow Corning New Era Interns who attended are Heather Lemon, Patrick Medland, Tricia Miller and Michelle

vanHartesvelt. The fifth intern, Andrew Hall, was traveling overseas and missed the luncheon.

The Teachers for a New Era Initiative is a campus-wide effort to establish new models for preparing high quality classroom teachers. The project has been gaining strength and momentum since its inception in 2002.

MIDLAND WELCOMES PRESIDENT

Midland, Michigan is a small city with a far-reaching impact. Headquarters to two multinational corporations, Dow Chemical Company and Dow Corning Corporation, Midland is also known for its strong culture of community patronage as evidenced by such treasures as the Dow Gardens, the Mildred Dow Center for the Arts, the Bartos Opportunity Center, the Hall of Ideas, and the Midland Community Center.

On Thursday, October 6, 2005, MSU President Lou Anna K.

Simon was the honored guest at a special luncheon hosted by Margaret Ann (Ranny) Riecker, president of the Herbert H. and Grace A. Dow Foundation. The occasion was attended by Midland's leaders in philanthropy, representing the Dow Chemical Company, the Charles J. Strosacker Foundation, the Rollin M. Gerstacker Foundation, the Alden B. and Vada B. Dow Creativity Foundation, the Midland Area Community Foundation, the Dow Chemical Company Foundation, and the Dow Corning Foundation.

"What a wonderful reception," said President Simon. "The local community is blessed, and institutions throughout the state, including MSU, also benefit from the ethos of civic responsibility that the individuals who built and lead these organizations have inspired."

President Simon also had the chance to visit the new Bartos Opportunity Center, named in honor of MSU alumnus John Bartos.

Seated (l to r): Margaret Ann Riecker, president and trustee, Herbert H. and Grace A. Dow Foundation; Lou Anna K. Simon, president, MSU; Michael Dow, vice president and trustee, Herbert H. and Grace A. Dow Foundation.

Standing (l to r): Terri Johnson, public affairs site leader, Dow Chemical Company Foundation, Michigan Operations; Lucille Fallon, director, Corporate and Foundation Relations, MSU; John Bartos, trustee, Charles J. First Year Success in Dow Corning Foundation Program

"I t was a learning experience that I have put to excellent use in my own classroom."

That was the unanimous verdict of the Dow Corning New Era Interns who joined President Lou Anna K. Simon and members of the MSU faculty and staff in thanking the Dow Corning Foundation for its generous gift of \$200,000 to the Teachers for a New Era Initiative.

Last summer, five high school science teachers who are recent graduates of MSU, participated in the first of three summer programs funded by the Dow Corning Foundation grant. Each science teacher/intern worked with a mentor scientist at a laboratory, either on the MSU campus or at the Dow Corning Corporation, over
